

What be down	What not be down
GUI	GUI design looks simple, and the arrangement of Panel, text_area, text_field, button is not comfortable
Menu1 all functions	Didn't design the instruction of input and input in text_area
Menu2 all functions	Didn't design the instruction of input and input in text_area
Menu3 all functions	Didn't use all menu class in UI class
Menu4 all functions	Perhaps the size of code is so large, don't make optimization, the speed of System processing is so slow
